Hello

My name is Marko Sokk and I am a student at Tallinn University of Applied Sciences. I am writing a research for my thesis for Estonian Maanteeamet .The subject of my research is : "The impact of heavy vehicles winter tires minimal tread debth during winter season".The main subject of my research is that should Estonia also change the current law regarding minimal tire tread debth on heavy vehicles following the example of Sweden and Norway. Because of that I wanted to ask if i could use the Winter tyre list found at this link:

<http://www.stro.se/winter/Winter131016English.pdf> in my research. The list would remain unchanged.

Waiting for a quick reply.

Best regards

Marko Sokk

Hello Marko !

Of course you can use the STRO list of winter tires for your research in Estonia.

I hereby send you the list of winter tires for trucks in Sweden and Norway that STRO has made on demand from Transportstyrelsen in Sweden and also for Norway.

Please inform me about the progress in a coming winter tire regulation in Estonia.

I will check for some studies about truck tires and winter performance and send it to you when I find it.

Best Regards

Bernt Wahlberg
